

WILKINS

a **ZURN** company

1747 Commerce Way, Paso Robles, CA 93446 Phone: (805) 238-7100

September 30, 2005

Subject: Lead warning supplied with Wilkins products.

To whom it may concern:

Per the State of California Proposition 65 requirements, all manufacturers of plumbing products that produce items that contain **any** amount of lead, are mandated to supply a warning stating the product contains a certain amount of lead. The warning is required since the State of California Proposition 65 does not establish a maximum amount of lead per weight.

It should be noted that all Wilkins products comply with the Federal Safe Drinking Water Act, which does establish a maximum lead per weight requirement. Our products also comply with all established product performance standards both in the United States, Canada and throughout the world.

Since we do not supply valves specific to California, all products distributed in the United States and Canada include the lead warning.

I trust this information will help clarify this issue, and would be more than happy to discuss this matter in further detail. I can be reached at (805) 238-7100.

Sincerely,

Brad L. Noll
